

MONTHLY NEWS

VOLUME NO 21

JULY 2012

**LIGHTING
FOR THE
2012
OLYMPICS**

At the forefront of alternative technology — Low Energy Designs are pleased to be a part of the major sporting event of 2012 this summer. Supplying our Solar Sign Lights, we have been able to offer a prompt and efficient service to meet customer demands.

The products use our intelligent energy saving LED fittings, with the popular Min O Module powered by a scalable solar panel. This provides a great solution which works well with both street signage and a range of other options.

We are proud to be able to make a contribution and wish all competitors the very best.

New premises for Low Energy Designs!

We recently found ourselves in the position of needing new premises to help support our on-going development. The opportunity to relocate to the Sunrise Business Park in Blandford has proved to be ideal. Our CEO Alan Parker stated, "Moving from our current base in Sturminster Marshall will really allow us to focus on both expanding and improving our production facilities, we also hope it will enable us to offer more jobs to the local workforce."

At the root of the move is our constant commitment to improvement, with our core value being to ensure all work is undertaken efficiently and to the highest possible standards.

Coming Next Month:-

Support available for using new technology

Product focus

QUOTE OF THE MONTH:

By using our energy efficient products you can save money and help conserve natural resources

Proud to be a UK manufacturer

Good News—one of our apprentices, Luke, has received 97% in his Communications module!
