**DON'T LET YOUR MONEY GO UP
IN SMOKE LIKE A FIREWORK!
TALK TO US AND LET US HELP YOU TO
CUT YOUR COSTS BY UP TO 80% IN
ELECTRICITY AND REAP THE BENEFIT
OF LED LIGHTING!**

With November comes the fun of the celebrations of Guy Fawkes night, the bonfire and fireworks, and maybe the odd hotdog or two! It's amazing just how much it can all cost, a few minutes and lots of money up in smoke without a great deal of thought for the expense.

At Low Energy Designs we are struck by how similar this can be to the way in which some

businesses treat their lighting bill, with no consideration as to how much money goes towards electricity to power old or inefficient lighting.

Our systems can offer enormous cost savings of up to 80% on traditional technology, which is definitely worth considering as energy costs continue to rise.

Rather than burn money, why not ask us for a free review of your lighting needs and see just how much we can help you to save.

IKEA IN SWEDEN TRANSFORM THEIR WALKWAYS WITH OUR SUNBURST LED LIGHTS!

AMAZING DISPLAYS CREATED WITH OUR SUNRAY LED LIGHTS AT UNDERWATER WORLD SUNSHINE COAST IN MOOLOOLABA AUSTRALIA.

Low Energy Designs recently supplied Underwater World in Mooloolaba, Australia with products from our SUNRAY LED lighting range. The installation of our fittings has not only ensured a significant reduction in energy costs, but also provided a spectacular display of lighting for this Aquarium and its visitors.

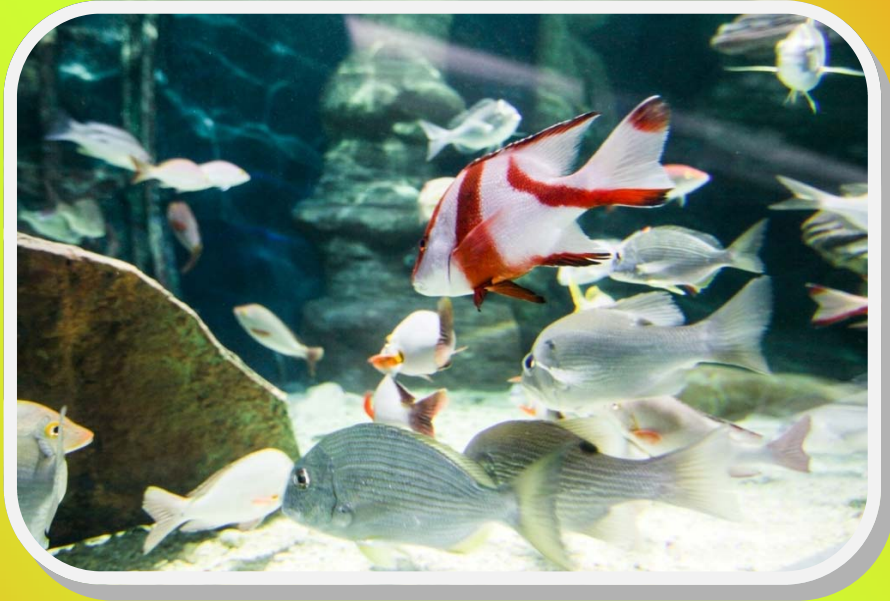

Our LED Lights can be programmed with a vast range of colours throughout the entire colour spectrum. Displays limited only by your imagination.

Our lights enable the customer to tailor the lighting sequences to their own requirements. There is no need for air conditioning as the lights do not generate heat and so the temperature of the water is always maintained.

Coming Next Month:-

DAIRY CREST FROME IN SOMERSET INSTALL OUR LED LIGHTS.

Contact us for a free site survey with one of our technical team who will provide you with a full assessment of your current lighting and a calculation of return investment to enable you to make these cost-effective improvements. Give us a call now on **01258 858171** and we can arrange for an adviser to get in touch.

Please contact us for further information or visit our website www.lowenergydesigns.com for more case studies and our full product range.
