**LED LIGHTS PROVE POPULAR FOR EVERYONE AT CHRISTMAS SO WHY NOT USE THEM ALL YEAR ROUND TO KEEP THE COST OF YOUR ELECTRICITY BILLS DOWN TO A MINIMUM!**

The Christmas season is drawing near and we are all looking forward to celebrating the festive season in our own ways. For many it will be time with the family, presents, Christmas dinner and then snoozing in front of the TV. One thing is certain – most of us will be paying off the cost of Christmas well into the New Year!

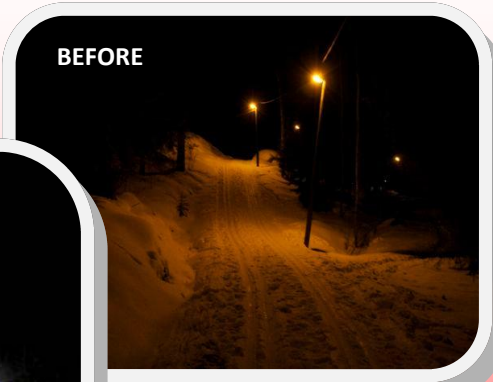

This aspect is relevant to the energy costs of many businesses. Using old and inefficient technology will always result in big expense down the line. Unfortunately with the rising costs of electricity these bills are going to go up significantly. So, this season may be an ideal time to consider moving over to LED lighting.

**With Low Energy Designs UK-made fittings you can be assured of high quality lighting that will both lower your energy bills and provide a better quality of light.**

**Our SunBURST LED Lights greatly improve this ski area in darkest Sweden and look impressive at night keeping pedestrians and skiers safe. The spread of light not only highlights the pathway but also the surrounding areas and gulleys.**

**The Before and After photographs speak for themselves.**

## PAGE 2- DAIRY CREST- FROME are delighted by our LED Skylight ceiling panels

Low Energy Designs have recently supplied our Skylight LED ceiling panel products to the Dairy Crest factory in Frome, Somerset. The fittings have provided significant energy savings over the existing 4 x 18Watt fixtures, as well as a much improved quality of light. Working closely with electrical contractor Electrico, this installation has added to the SunRAY and SunBURST fittings that Dairy Crest had already purchased.

Being installed in a production environment meant that the fittings had to comply with stringent food safety regulations. As a result Low Energy Designs worked hard to come up with a bespoke solution, using food-safe neoprene sealing components to fully meet customer requirements. The company have been so pleased with the SkyLight that they have already ordered more of this product!

An NHS TRUST HOSPITAL ward and corridor is transformed by our Skylights and each patient will benefit from these LED lights which replicate the daylight.

Contact us for a free site survey with one of our technical team who will provide you with a full assessment of your current lighting and a calculation of return investment to enable you to make these cost-effective improvements.

Give us a call now on **01258 858171** and we can arrange for an adviser to get in touch.

**Please contact us for further information or visit our website [www.lowenergydesigns.com](http://www.lowenergydesigns.com) for more case studies and our full product range.**
