PIONEER FOODS TRANSFORM THEIR LOADING BAY & AISLES WITH OUR LED HIGH BAY SUNRAY8 LIGHTS!

Pioneer Foods are one of the largest and longest running independent suppliers to the catering trade in the UK. When looking for professional input to their lighting needs they naturally turned to Low Energy Designs, as a Company who had the best products and who could work with them to find the best possible solution.

As a result of our survey and lighting designs they installed a number of our SunRAY 8 LED luminaires. These products offer substantial savings on traditional fittings, whilst offering a very high quality light output.

Pioneer Foods have demonstrated a keen interest in reducing their Carbon Footprint and Co2 emissions and by investing in our LED Hi-Bays will reduce this by 62%.

With this installation Pioneer Foods will be reducing their Carbon Footprint by 40 tons and saving up to 76000 kilowatts of electricity.

Our LED Lights have dramatically improved the lighting in this busy loading bay area.

This photograph of the loading bay shows the benefit of our LED lighting. The surrounding area is not lit by LED lights and the difference in the parking area is clearly noticeable.

OTHER PRODUCTS

- STREET LIGHTS
- CAR PARKING
- OFFICES
- PETROL FORECOURTS
- FLOODLIGHTING
- SIGN LIGHTING ETC...

With the added flexibility of the individual modules on our Hi-Bays, these lights also assist the unloading of the lorries as the modules can be tilted to provide extra or direct lighting inside the vehicles.

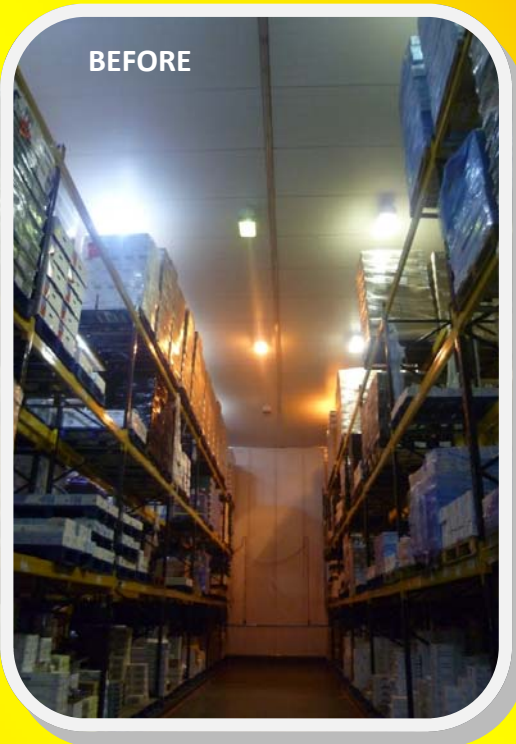

PAGE 2- BEFORE & AFTER PICTURES AT PIONEER FOODS

This “before” photograph on the left reveals the quality of lighting in the aisles at Pioneer Foods prior to the installation of our LED High Bays. The “after” photograph shows the dramatic improvement in the lighting of this aisle which makes it a much safer

environment for staff to work in, particularly if fork-lifts are in operation.

The products stacked on the shelves are also much more visible which should assist the staff working in these areas.

Using our leading control technology, the service life of our LED’s has proven to exceed 84,000 hours, meaning customer satisfaction for Pioneer Foods for many years to come.

Springtime!

The last few weeks have given some good signs that Spring has come. The days are getting longer and the temperatures are rising, at last! It would very easy to forget lighting now that the sun is shining a bit more. But at Low Energy Designs we suggest that you consider your annual spend on lighting – particularly as electricity bills continue to rise.

QUOTE OF THE MONTH

“LED LIGHTING IS THE ONLY WAY FORWARD TO ENSURE MAXIMUM COST SAVINGS. DON'T GET LEFT BEHIND CALL US TODAY!”

Contact us for a free site survey with one of our technical team who will provide you with full assessment of your current lighting and a calculation of return investment to enable you to make these cost-effective improvements.
