WHY NOT KEEP SUMMER ALL YEAR ROUND!

ALL OUR LED PRODUCTS SIMULATE 'DAYLIGHT' WHICH CREATES A KINDER AND CLEANER ENVIRONMENT IN WHICH TO WORK.

Help your staff and customers by installing our LED SkyLIGHTS or GLOW lights which greatly improve the quality of office lighting whilst providing health benefits for those working on computer monitors all day!

Investing in our SkyLIGHTS and GLOW LED Down Lights will reduce your electricity and CO2 emissions by up to 80%.

The sleek finish and contemporary appearance of our office lighting proves very popular.

We work with LUSH, a company renowned for creating a 'Green' environment for their staff and customers. LUSH are always keen to ensure their staff work in good surroundings so invested in our LED lights as part of their 'Green' principles. Their Sustainability Manager also obtained feedback from their staff following the install:

LUSH LED lighting: User survey

Three months after the new LED lighting was installed, LUSH wanted to know what the staff thought of the work they had done. A survey was conducted and the answers to the questions asked are shown below. The response was outstandingly good. The lights have been very well received, and the managers' comments in particular highlight the many different ways the room has benefited.

Did you notice when the lighting was changed ?

no 0% yes 100%

Q1: Did you notice when the lighting was replaced?

An excellent response, everyone I asked noticed the change.

Is the lighting brighter now?

no 0% yes 100%

Q2: Is the lighting brighter / better now?

Again everyone was positive about this. Technically we have over 300% more lux in the building, and are using less electricity. Everyone appreciated the difference.

**The Sustainability Manager interviewed his Production & Shift Managers, below are a few quotes:
Shift Manager**

“The lighting means we get a better colour, a better mix & a better quality”

“When we run a double shift there is more energy especially in the last few hours”

“The brighter lighting showed up the dirt on the floors, and so we cleaned more to make it look good”

“It was for us great”

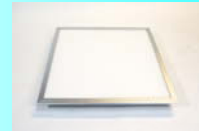

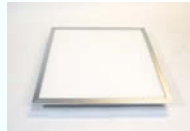

Production Manager

“We appreciate it every time we come back from next door”

“I can’t imagine it now without these lights”

“They have made a huge difference”

Our Skylights and Glow LED Lights installed around the world.

QUOTE OF THE MONTH

“WHY NOT WORK IN DAYLIGHT ALL YEAR ROUND. TALK TO US AND LET US HELP YOU INSTALL THE BEST IN LED OFFICE LIGHTING!”

Contact us for a free site survey with one of our technical team who will provide you with full assessment of your current lighting and a calculation of return investment to enable you to make these cost-effective improvements.
