**OUR LED FLOOD  
LIGHTING IN  
SENEGAL**

IKEA are experiencing savings of up to 93% in Electricity by installing our LED lights. With our wireless monitoring and control system this enables IKEA to monitor their own energy savings, something that IKEA were keen to invest in.

The vast spread of light achieved from our SunBURST8 lights make them ideal for Flood Lighting and Display Lighting.

## OUR LED SUNBURST8 LIGHTS IN SENEGAL HAVE COMPLETELY TRANSFORMED THESE OUTDOOR AREAS.

Our lights have made such a difference to these poorly lit areas and are only working at an average of 30% of full power. The alley way above was a place where goods were constantly stolen so this has helped to improve the security of the area. The lights in the alley are working at only 10 watts creating a massive saving in Electricity of up to 93%!

The lights will ramp up to 80 watts under movement activation for security measures. This has made it safer for the staff and for the stock stored in these areas. The lights are also controlled and monitored remotely as part of their energy savings programme as our customer in Senegal was keen to have complete control of his electricity usage.

### QUOTE OF THE MONTH

**“ INVEST IN OUR LED LIGHTS & SOFTWARE AND START TO MONITOR & CONTROL YOUR OWN ENERGY SAVINGS!**

Contact us for a free site survey with one of our technical team who will provide you with a full assessment of your current lighting and a calculation of return investment to enable you to make these cost-effective improvements.
