VOLUME NO37 ISSUE NO37

NOVEMBER 2013

Our SportsRAY LED lights are installed at Wickwoods Country Club.

OUR SPORTSRAY LED LIGHTS INSTALLED AT WICKWOODS COUNTRY CLUB SHOW THE VAST SPREAD OF LIGHT THAT CAN BE ACHIEVED WITH OUR SPORTSRAY RANGE.

Our lights are providing the tennis players with an even spread of light across the entire court and at the same time are highlighting the tennis balls to greater effect, improving play.

PAGE 2

The SportsRAY is an ideal solution for an indoor arena, gymnasium or tennis courts.

**IKEA
Warehouse in
Sweden.**

The SportsRAY LED light has the huge advantage of being modular so each module can be tilted to provide maximum light spread whilst maintaining the uniformity and eliminating glare.

**OTHER
PRODUCTS**

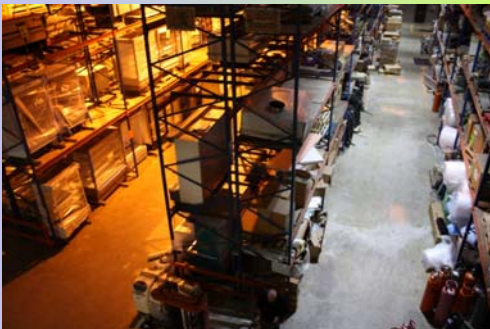

- STREET LIGHTS
- CAR PARKING
- OFFICES
- PETROL FORECOURTS
- FLOODLIGHTING
- SIGN LIGHTING ETC...

WITH An individual driver on each LED module, if one LED or module fails then it won't affect the rest of the light. Long MTBF components. The 10 - 24 modules (100-240 watts) can be upgraded by plugging in more modules, same for components or spares etc.

Our SunRAY 10 LED Lights installed at IKEA in Sweden have greatly improved one of the main warehouse aisles. The goods on the shelves can clearly be seen by all staff and fork-lift drivers.

The SunRAY10 is modular and has the benefit of modules which can be directed exactly where the light is needed. This is of great benefit in an aisle environment where many boxes need to be seen by the staff working in these areas.

QUOTE OF THE MONTH
“ HELP YOUR WAREHOUSE STAFF TO WORK IN A MORE NATURAL ENVIRONMENT & INCREASE PRODUCTIVITY”

Contact us for a free site survey with one of our technical team who will provide you with a full assessment of your current lighting and a calculation of return investment to enable you to make these cost-effective improvements.

Give us a call now on **01258 858171** and we can arrange for an adviser to get in touch.
