VOLUME NO 28 ISSUE NO 46

MARCH 2015

We receive a great recommendation letter from one of our big customers.

A Pharmaceutical Company installs our intelligent LED lighting solutions!

This Pharmaceutical company have been using our LED lighting products for over 5 years now!

This warehouse was a brand new building. Without Low Energy Designs LED Lighting Solutions, this warehouse would have been fitted with 67 SON T's which run at 400W each! Generating a massive 119.921 tonnes of CO2 each year!

PAGE 2

Another happy customer thanks to Low Energy Designs!

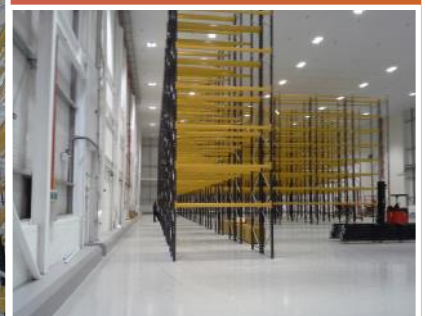

Instead, this warehouse had the installation of 48 x SunRAY 8 running at 88W, 16 x SunRAY 8 ULTRAS running at 140W & 3 x SunRAY 6 ULTRAS running at 105W.

Thanks to our intelligent LED lighting solutions this company will only generate 26.935 tonnes of CO2 a year, 77% less than if they had installed sodium lamps.

This company achieves 82% savings in electricity.

- STREET LIGHTS
- CAR PARKING
- OFFICES
- PETROL FORECOURTS
- FLOODLIGHTING
- SIGN LIGHTING ETC...

ANOTHER VERY HAPPY CUSTOMER

This warehouse has been completely transformed by our SunRAY Products. The staff can see clearly what's around them and now they work under a replica of Daylight lighting which gives them a safer environment in which to work instead of that musky orange!

We have replaced 500W Metal Halides, with our SunRAY 10's and SunRAY 8's which run between 88W and 110W.

Contact us for a free site survey with one of our technical team who will provide you with full assessment of your current lighting and a calculation of return investment to enable you to make these cost-effective improvements.

Please contact us for further information or visit our website www.lowenergydesigns.com for more case studies and our full product range.
