OUR LATEST UK INSTALLATION EXPECTS TO ACHIEVE 79% ENERGY SAVINGS!

Gregory Distribution have a very simple aim: To protect and improve the environment through pro-active management and the adoption of best practice.

Gregory Distribution need to replace approx. 68 x 400 watt high bays in their new warehouse. After our extensive lighting analysis and design we found that the best solution would be to replace these with our LumiOPTIMA 5218 and include our intelligent controls such as; daylight harvesting, maintained light levels and motion detection.
